

Les boîtiers en aluminium sont adaptés à l'installation, l'interruption de circuit, la connexion et le contrôle d'équipements électriques et électroniques, ainsi que leur application manuelle dans les domaines industriels, automobiles, ferroviaires, navals, des tunnels, des parkings et des édifices industriels, en offrant une résistance aux vibrations et mécanique élevée avec un degré de protection IP67.

CARACTÉRISTIQUES

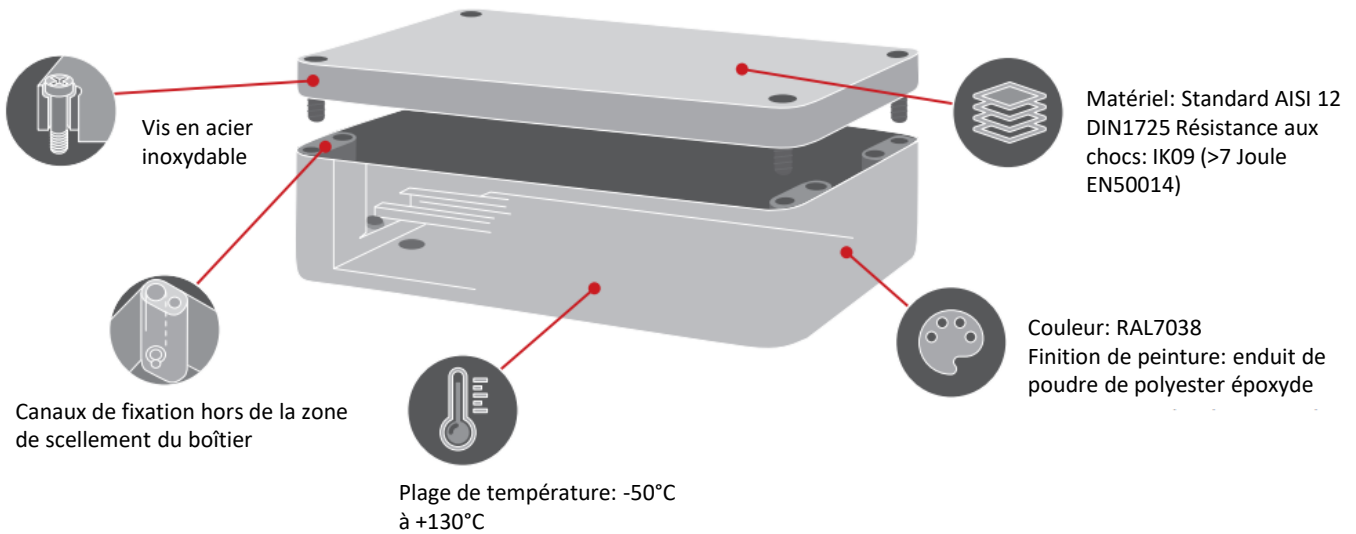

- Vis en acier inoxydable M4
- Matériau : norme AISI 12 DIN1725
- Degré de protection : norme IP66 EN60529
- Résistance à l'impact : IK09 (> 7 joules Norme EN50014)
- Plage de températures : -50 °C à 130 °C
- Finition de la peinture : revêtement d'époxy-polyester en poudre
- Couleur : RAL7038
